

Sculpture by Day.
 Beacon of Light at Night.
 Cozy Warmth any Time.
 The Obelisk
 Patio Heater + Light Torch

ENCLOSED FLAME DOES NOT BLOW OUT

The 25.5" square footprint evolves into a dramatic 7.25 ft. tall tapered, sleek stainless steel obelisk-like tower.

Above the enclosed gas tank housing dances an up to 4 ft high flame (adjustable), which is contained within a perfectly clear Japan-made Silica Quartz-Glass tube, thus protecting the flame from being blown out by wind or affected by weather. A shiny stainless steel wire guard cage surrounds the hot glass tube for extra protection.

The Obelisk patio heater's thoughtful professional construction allows for easy mobility by utilizing a set of included detachable wheels. Extra safety is provided by an extremely low center of gravity.

A full length zippered dust cover protects the Obelisk patio heater + Light Torch when not in use or stored.

WIND-RESISTANT FLAME DESIGN

In ancient Egypt an Obelisk stood for rays of light, symbolizing the sun god Ra. Set in pairs at entrances, they guarded the building and the people against evil influences.

Innovative engineering combines both factors - WARMTH + LIGHT - into the elegant, obelisk-shaped tapered outdoor heater, thus providing a unique 360-degree professional experience for home-owners and commercial entities alike.

Comfortable WARMTH + LIGHT radiate out along the complete length of the glass tube,

making the "hot head - cold tush" experience a thing of the past.

Family and guests feel snugly warm and comfortable, while softly dancing light rays delightfully illuminate the patio.

Easy to set-up and safe for roof top terraces, decks, gardens, pools, al fresco restaurants, sidewalk cafés or open air bars.

The Obelisk extends precious Outdoor Time well into chilly evenings. It brightens the cooler, darker days of the year at the same time, without setting up extra light sources.

- ▶ Size: H 86-5/8" | 7.25 ft. tall (220 cm)
Footprint: 25-1/2" x 25-1/2" (65 cm x 65 cm)
- ▶ Fuel: Liquid Propane (LP), requires 20 lbs standard tank (not incl.) or Natural Gas (NG)
- ▶ Energy: 32,500 BTU/h (9.3 kWh) on high
- ▶ Efficiency: LP 1.76 lbs/h (0.8 kg/h) on high
20 lbs. LP gas lasts 8-20 hours, depending on flame setting
NG input 30 ft³/h (.82m³/h)
- ▶ Heat Range: up to 385 sq/ft. | Ø – 19.6 ft.
- ▶ Electronic Spark Ignition
- ▶ 2-step adjustable Flame
- ▶ Shut-off Tilt Valve
- ▶ Includes: Wheel Kit + Full Length Dust Cover
- ▶ Components:
 - Stainless Steel 201 Panels + Guards - Commercial Quality w/clear varnish
 - Sturdy Aluminum Frame + Reflector
 - Japan-made specialty tempered Silica Quartz-Glass tube for safety
 - LP (Propane) Burner or Natural Gas - LP Regulator unit
- ▶ Color: Silver, Satin Finish
custom color on request
- ▶ CE | ETL listed 4000335
- ▶ Residential | Commercial Intertek
- ▶ 1 year limited warranty
Net weight: 57.3 lbs (26 kg)
Shipping weight: 60 lbs (30.5 kg)
Shipping dimensions: 54" x 30" x 7" (140 x 79 x 20 cm)
Ships knock-down, requires assembly.
